

TODESCO - VERTICAL WAREHOUSE

Todesco: more order, improved procedures, and increasing accuracy, with vertical warehouse Vertimag

The company choose Ferretto's vertical warehouse for an advaced logistic.

200 square meters of space saved, faster picking, as well as safer and more accurate order management. By choosing Vertimag, Todesco has revolutionized its logistics system. Thanks to the versatility offered by a range of 120 trays and 6 picking bays, and thanks to the innovative solutions that guarantee ease of use and integration with the company's CRM, Ferretto's new automatic vertical lift module proves to be the right choice for the storage needs of the most varied sectors.

Vertimag for Todesco

For over 50 years Todesco has been producing cutting-edge leather tanning and finishing systems for the world market, meeting the needs of the most important car makers and high fashion brands among others. The company has chosen Vertimag to store the components necessary for the assembly of machinery, semi-finished and finished products. By taking advantage of the available height, Vertimag makes it possible to recover a significant amount of space to be used for production while the accessories supplied, such as the laser pointer and the sliding console, speed up picking and placing operations, and reduce picking errors to zero.

More efficient management

The transition from a storage system based on traditional drawers and shelves - with the consequent problems due to a far from perfect rationalization of space and stock management - to Ferretto's automatic system has enabled Todesco to improve the service offered to its customers by optimizing inbound flows and order fulfillment procedures.

Objectives

- Reorganize the available storage space
- Ensure order in the entire warehouse
- Simplify picking operations
- Increase productivity
- Improve the traceability of stock
- Guarantee that materials are protected and kept clean
- Automate and upgrade the production process

Solution

- No. 1 VERTIMAG 84 XL800 storage system with Ergo-Tech bay – height 6,861 mm
- No. 42 840 mm x 4250 mm trays - capacity 800 kg
- Accessories: laser pointer and sliding console

Value added

- Process innovation
- Optimization of available storage space
- Elimination of errors. Thanks to the laser pointer, operators know exactly which items are to be picked or placed
- Continuous traceability of handling operations and stock thanks to the connection with the company's ERP
- More efficient and quicker order preparation thanks to the sliding console that is always within reach of the operator during picking and placing activities
