Vertical Lift Modules Vertimag

Vertical Lift Modules for plates and bars Steel Tower

Vertical carousels Eurot

Warehouse Management System

Why a Vertimag vertical lift module?

 Up to 90% of space saved

 Quicker order preparation

 An ergonomic solution offering absolute safety

 Higher productivity

 Improved stock management

 Safe storage of goods

THEY CAN BE TAILORED AND CONFIGURED ACCORDING TO THE NEEDS

Flexibility is the strength of **Vertimag**, one of Ferretto's most successful products for more than 20 years, which can manage small and medium-sized items in any shape and weight, thus meeting the logistics needs of companies in the most different industrial sectors. Vertimag is available in 15 models, each with 4 different tray capacities. This storage solution can be equipped with the Ergo-Tech system, which can manage the same flows as a double bay while always offering perfect ergonomics.

TRADITIONAL STORAGE

STORAGE WITH VERTIMAG

Automatic Vertical Lift Modules Vertimag

 **Exclusive**

- Ergo-Tech picking bay
- 15 models (5 widths and 3 depths - footprint)
- 120 tray combinations
- Possibility of outdoor installation without additional cladding structure
- WMS designed and developed by Ferretto Spa

Plus

- Decreased footprint up to 1/10
- Increased productivity up to 7 times*
- Ideal for materials of different types, weight and size
- Elimination of errors
- Storage control
- Reduction of risks and loss of goods
- Ergonomics
- Improved efficiency
- Increased safety for operators

Technical data

1. High-strength tubular structure
2. High-durability pre-painted sheet paneling
3. Touch Panel screen 12" with sockets for external devices and user-friendly graphics
4. Different picking bays suitable for all needs
5. Check for incoming goods height - Pitch 25mm
6. Safety barriers for the operators

HEIGHT (m)	from 3,2 to 12 (every 200mm)
GROSS CAPACITY MAX (kg)	70.000
MATERIAL HEIGHT MAX (mm)	695
TRAY PAYLOAD FOR THE ENTIRE RANGE (kg)	300 - 550 - 800 - 990
TRAY SIDE HEIGHT (mm)	70 - 95 - 120 - 145 - 170
FLEXIBLE PITCH (mm)	25
PICKING BAYS	Internal Single Bay / Internal Double Bay / Ergo -Tech / External Single Bay / External Double Bay / Extractable Bay

* Data verified and confirmed on a sample basis of historical customers

Our wide range of bays

During the design stage, Ferretto supports the customer with professional advice in the choice of the type of bay that most suits their needs.

The **Single Internal Bay (BIS)** is recommended when the priority is guaranteeing ergonomic and safe working conditions to the operators when handling the products in the trays. It can be easily transformed into a **Double Internal Bay (BID)** to improve warehouse performance.

The **Single External Bay (BES)** or the **Double External Bay (BED)** is the right choice when it comes to safely handling goods by means of external equipment or to handling heavy and bulky goods that must be accessed without hindrances.

The **Ergo-Tech Bay (BIG)**, instead, is the best solution for very deep trays, when ergonomic working conditions and the speed of a double bay are required but there are space issues.

The **Extractable Bay** allows the operator to manually extract the trays from the machine and handle heavy materials in total safety. It occupies the same space as an internal bay.

How can a Vertimag lift module be organized?

The trays can be equipped with dividers and separators that can be chosen according to the needs and added/removed at any moment, thus ensuring maximum flexibility.

- Plastic boxes
- Tray slots
- Kit clips and flat dividers
- Clip kits and grooved dividers
- Flat dividers
- Cardboard boxes

ORDER AND PRECISION IN YOUR WAREHOUSE

The many accessories available make it possible to handle items in various shapes, sizes and weights in a more orderly and efficient way, speeding up order preparation and reducing errors.

Vertimag and integrated technology

When it comes to integrating different technologies, Vertimag represents a state-of-the-art product and ensures flawless interaction with the company's ERP system and the most innovative technological solutions such as:

- Anthropomorphic robots
- Put to Light systems
- Jib cranes
- Conveyor belts and roller units
- Weight handling/zero-setting devices

ANTHROPOMORPHIC ROBOTS

PUT TO LIGHT SYSTEMS

JIB CRANES

CONVEYOR BELTS AND ROLLER UNITS

WEIGHT HANDLING/ZERO-SETTING DEVICES

Many accessories for a more efficient warehouse

Ferretto's solutions can boast high efficiency and productivity also thanks to the numerous accessories that have been designed and manufactured to meet the picking and placing needs of each individual customer.

- Laser Pointer
- Alphanumeric LED bar
- Barcode/QR Code reader
- Sliding console
- Shutter door
- Counting scale
- Trolley for tray extraction
- Put & Go - Order preparation cart

LASER POINTER

ALPHANUMERIC LED BAR

BARCODE/QR CODE READER

SLIDING CONSOLE

SHUTTER DOOR

COUNTING SCALE

TROLLEY FOR TRAY EXTRACTION

PUT & GO - ORDER PREPARATION CART

EXCLUSIVE ERGO-TECH SYSTEM

Thanks to its operating principle, the Ergo-Tech dual-level picking bay manages the same flows as a double bay while offering more flexibility as to the material to be stored. Unlike other systems available on the market, it does not have, for example, the product height limitations that can be found in a traditional dual-level bay.

INSULATED SELF-SUPPORTING SOLUTION FOR OUTDOOR APPLICATIONS

REINFORCED EARTHQUAKE-RESISTANT STRUCTURE

FIRE - FIGHTING SYSTEM (AVAILABLE ON REQUEST)

ELECTROSTATIC DISCHARGE SYSTEM

Why an Eurot vertical carousel?

Space and time optimization

Remote access to and consultation of records

Traceability of materials and operations

Safe storage of goods

Specifications

1. Steel structure
2. Tray rotation carousel
3. Picking bay
4. Operator interface
5. Electrical cabinet
6. Shelf configuration differentiated by unit load
7. Work counter

Features

- Optimisation of space and working times
- Traceability of materials and operations
- Remote archive access and consultation
- Protection of goods

Vertical carousels Eurot

Automatic vertical carousel for storage and picking

Eurot is an automatic storage system with rotating shelves; it is the ideal solution when the available space is limited and the ceiling height does not exceed 4 m, the items to be stored are light and have uniform size and weight, and the material can be handled safely even without lifting equipment.

The rotating shelves always follow the shortest route while guaranteeing maximum picking and placing speed. Thanks to its versatility, Eurot is the ideal automatic storage system for both offices and manufacturing facilities.

Why a Steel Tower vertical lift module for plates and bars?

Rotating filing system with standing ring binders and documents

Temperature-controlled rotating storage systems (Hospital Sector)

Rotating storage systems for integrated circuit components

Rotating storage systems for manufacturing facilities (footwear industry)

More space saving in the warehouse

Reduced risks for operators

Storage monitoring

Improved efficiency

Fewer errors

Automatic stacking and separation of metal sheets on/from the trays

VERTICAL LIFT MODULE FOR PLATES AND BARS
STEEL TOWER WITH SINGLE TOWER

VERTICAL LIFT MODULE FOR PLATES AND BARS
STEEL TOWER WITH DOUBLE TOWER

Specifications

- 1. Access door
- 2. Lift motor
- 3. Elevator

- 4. Safety barriers
- 5. Trays
- 6. Semi-automatic shuttle with optional pantograph

Vertical Lift Modules for plates and bars Steel Tower

Automatic vertical system for the storage and picking of bars, section bars, plates and metal sheets.

Steel Tower is a high-density automatic storage system with single tower (MM models) or double tower (MB models) modules for bars, section bars, plates and metal sheets.

Material loading and unloading operations are performed by means of a lift. Various coupling (decoupling) devices - between tray and product - are provided, so that storage without pallets is possible. Every operation, including maintenance, is carried out according to the highest safety standards.

Warehouse Management System

The EjLog Warehouse Management System designed by Ferretto can be seamlessly integrated with the customer's ERP.

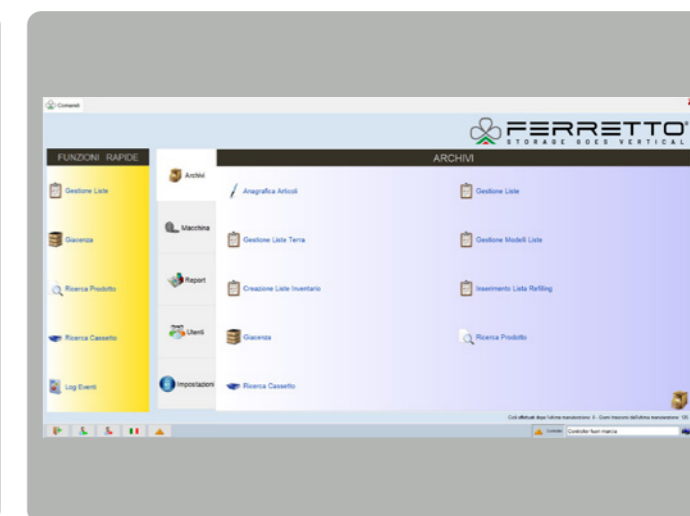

Thanks to its intuitive graphic layout and user-friendly interface, EjLog is the ideal software for managing all types of automatic storage solutions, traditional racking systems as well as the storage areas at ground level.

EjLog enables real-time warehouse management through a regular computer interface on PC or radio frequency terminals, in the case of traditional storage systems and storage areas at ground level, and at the same time allows remote monitoring and intervention.

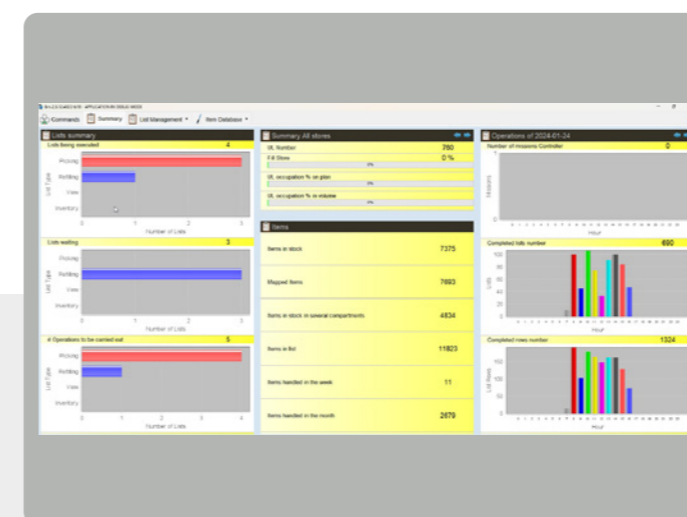

Its "open" architecture facilitates dialogue with the company's ERP, ensuring increased productivity and space optimization through correct data management.

Summary of warehouse statistics

Tray search page

Main functions of EjLog for the management of automatic storage systems and storage areas at ground level:

- 1 Identification of inbound products
- 2 Storage within the storage system
- 3 Consultation of data concerning the products stored in the system
- 4 Retrieval of goods/products from the system
- 5 List execution with optimized logic
- 6 Connection to company host system
- 7 User management and authorization for the available functions
- 8 Reports

Goods and stock management and control

Optimization of space and flow management

Increased efficiency

Fewer errors

Preventive maintenance

Remote control

Simultaneous management of all storage and handling systems

Service Desk

Our customers

Service Desk is a detailed reporting system which Ferretto offers to its customers for better management of Vertimag storage systems. Through a web portal, customers can access all data related to their machines in real time, for example:

- Data of the storage systems (in the case of more than one system distributed in different company premises)
- Diagnostic data (alarms, errors)
- Mission log
- Storage system technical sheet
- Statistics on the use of trays
- Maintenance

Better system control

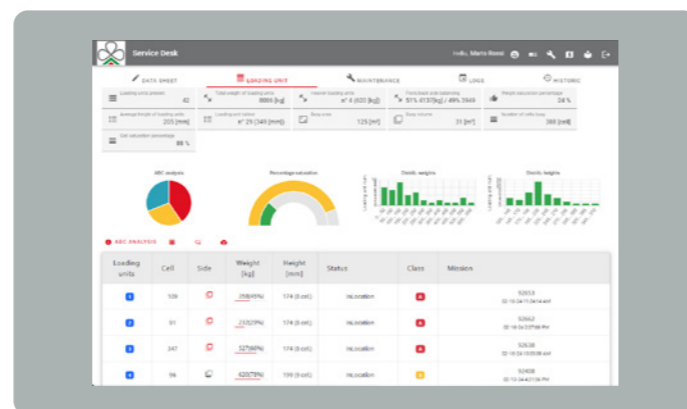

Statistic data and reports in real time

Preventive maintenance

Number of missions carried out
